

Hip Helpers®

SUPPORT SHORTS

CONVENIENT...ATTRACTIVE...INEXPENSIVE...AND BEST OF ALL...THEY WORK!

Hip Helpers® Support Shorts are the answer to excessive hip abduction in babies and toddlers with low muscle tone. They have been found to improve rotational movement and limit “W” sitting in babies who are developing their movement skills.

Hip Helpers® Support Shorts were developed by a physical therapist, in response to the physical therapist’s frustration with the “figure eight” wrap. They were designed for, and tested on, babies from six months to three years old in an early intervention program. They have also been used on older children with very positive results.

Hip Helpers® Support Shorts are available in the sizes below. It is important to try different sizes on a child to get the desired result. A Sizing Kit, which includes one sample of each size, is suggested to assist with this process. Additionally the shorts are available in custom sizes.

SIZE	WAIST	HIP	LENGTH
A	14.5”	15”	7”
B	15.5”	16”	8.5”
C	16.5”	18”	9”
D	17.5”	20”	9.5”
E	18.5”	21”	10.5”

Available Colors: **Red** **White** **Blue**
 Pink **Purple** **Black**

VA residents must add 6% sales tax.

Free domestic shipping. Standard size shorts are refundable and exchangeable within 30 days.
